*1: At this time the brightness would have decreased to approximately 1/2 of its original level. After approximately 20,000 hours, cleaning needs to be performed (by the vendor which you purchased from). The light source's lifetime may be shortened due to environmental conditions and operating mode.
 *2: The screen size is that of the original aspect ratio. *3: The lens shift cannot be used or its range of operation is limited with a fixed-focus lens.
 *4: Average value. Each product has an individual variable in weight.

Smart Projector Control is an application for a smartphone that enables the operation of Panasonic projectors. By installing Smart Projector Control in your iPhone or Android device and connecting the device via wireless LAN (Wi-Fi) to a network connected with Panasonic projectors, you can operate the projectors and check their status using your iPhone or Android device.

Example of system configuration

Advantages

- Basic, frequently used operations, such as turning the power ON/OFF and adjusting the lens, can be done just like using a remote control.
- Multiple projectors* can be operated simultaneously, and the status of a selected projector can be checked.
* Up to 64 projectors can be registered.
- A detailed screen of projectors registered in Early Warning Software can be displayed.

This application can be downloaded for free from the App Store (iOS version) or Google Play (Android version).

Flagship Picture Quality

The World's Smallest and Lightest*2 20,000-lumens Laser Projector
Combining SOLID SHINE Laser with next-generation 3-Chip DLP™ processing technology, the PT-RZ21K Series develops 21,000 lumens*1 of brightness with truly spectacular color performance.

High Reliability in Dusty Environments

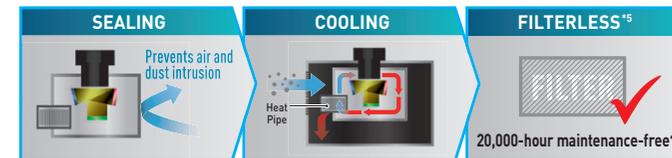

Dual-Laser Drive
Solid-state laser diodes are grouped into two discrete modules. A redundancy circuit minimizes brightness- and color-uniformity loss should a laser diode fail, making the PT-RZ21K Series ideal for mission-critical applications.

Shielded and Dustproof Optical Unit
Hermetically shielded laser modules, durable filtering, and refined air-intake maintain brightness and extend life in dusty location.

Panasonic Dust Test Standard

Filterless Design
The Panasonic PT-RZ21K Series is the world's first 3-Chip DLP™ laser projector*4 to eliminate need for a consumable air filter, enabling maintenance-free operational life of 20,000 hours*5 for the whole projector. This is achieved with a hermetically shielded optical engine and heat-pipe-based internal cooling system with a one-way airflow.

SOLID SHINE LASER 4K DIGITAL LINK Geo. Pro 360°

*1: Luminance measured at center of screen. *2: World's Smallest and Lightest laser projector in the 20,000-lumens class as of December 2017. *3: American Society of Heating, Refrigerating, and Air-Conditioning Engineers. *4: As of October 2017. *5: At this time the brightness would have decreased to approximately 1/2 of its original level. After approximately 20,000 hours, cleaning needs to be performed by the vendor which you purchased from. The light source's lifetime may be shortened due to environmental conditions and operating mode. *6: Resolution 5,120 x 3,200 Pixels (QUAD PIXEL DRIVE: ON)

*1: At this time the brightness would have decreased to approximately 1/2 of its original level. After approximately 20,000 hours, cleaning needs to be performed by the vendor which you purchased from. The light source's lifetime may be shortened due to environmental conditions and operating mode. *2: The screen size is that of the original aspect ratio. *3: The lens shift cannot be used with a fixed-focus lens. *4: Average value. Each product has an individual variable in weight. *5: Input signals that exceed the native resolution will be converted to the native resolution.

*6: Lens-less model. *7: Luminance measured at center of screen. *8: 1.27-5.08 m (50-200 inches) with the ET-DLE055. 2.54-7.62 m (100-350 inches) with the ET-DLE030. *9: Horizontal +28% with the ET-DLE085. *10: Height: with legs at shortest position. *11: Depth: including the supplied lens. Depth: 538 mm (21-3/16 inches) for the lens-less models. *12: CD-ROM includes Logo Transfer Software and Multi Monitoring and Control Software. *13: Vertical +45 %/-13 % with the ET-DLE085.
