

Enterprise Alerts & Notification Solution

Enterprises, regardless of sectors they operate in, have invested millions of dollars in putting together an infrastructure that helps them to conduct daily business efficiently. On experiencing downtime, risks associated with the event needs to be mitigated immediately to prevent it from developing into a crisis or full-blown disaster.

With the increasing importance of IT in various aspects of an organization whether it be for customer service, operations, marketing or finance, it is necessary for companies to maintain continuous network uptime to ensure business continuity.

sendQuick is an omnichannel notification management platform developed by TalariaX. It has a range of solutions to address critical IT requirements by sending instant alerts & notifications to minimize system & operations downtime, enabling corrective action in time. It can send 2-way Alerts from IP addressable infrastructure (both IT/ non-IT), third-party applications to users across the enterprise.

sendQuick is available on the following platforms:

Benefits of sendQuick's Notification Solution:

- ★ Notification management platform to centralize, consolidate, correlate, and precisely deliver alerts and notifications via SMS
- ★ Out-of-band SMS (text) alerts in real-time
- ★ Dual integration with any application via email or HTTP Post
- ★ Automated Reminder & Escalation with 2-way SMS
- ★ Supports email SMTP, SNMP Traps, Syslog messages and converts to SMS
- ★ Policy based & intelligent SMS routing; filter for selective SMS alert messages
- ★ Send messages instantly via SMS, email, social messengers and collaboration tools (WhatsApp Business, Facebook Messenger, LINE, Viber, Telegram, WeChat, Slack, Microsoft Teams, Cisco Webex)
