Blazing Speed, Full Immersion

The Curve Champion

The leader in curved monitors. Samsung has led the curved monitor market since being the first to introduce the innovative displays to the world in 2015. With industry-leading technology in a full line-up, Samsung's curved monitors are consistently number one in market share and consumer choice.

Dive Into the Curve

The winner's curve. Get fully immersed in every game with a deeply rounded 1800R curved screen. Win more, as sharp focus on the screen gives you heightened concentration. Game for longer with less eye strain, and play on and on.

Smooth, Fast Visuals

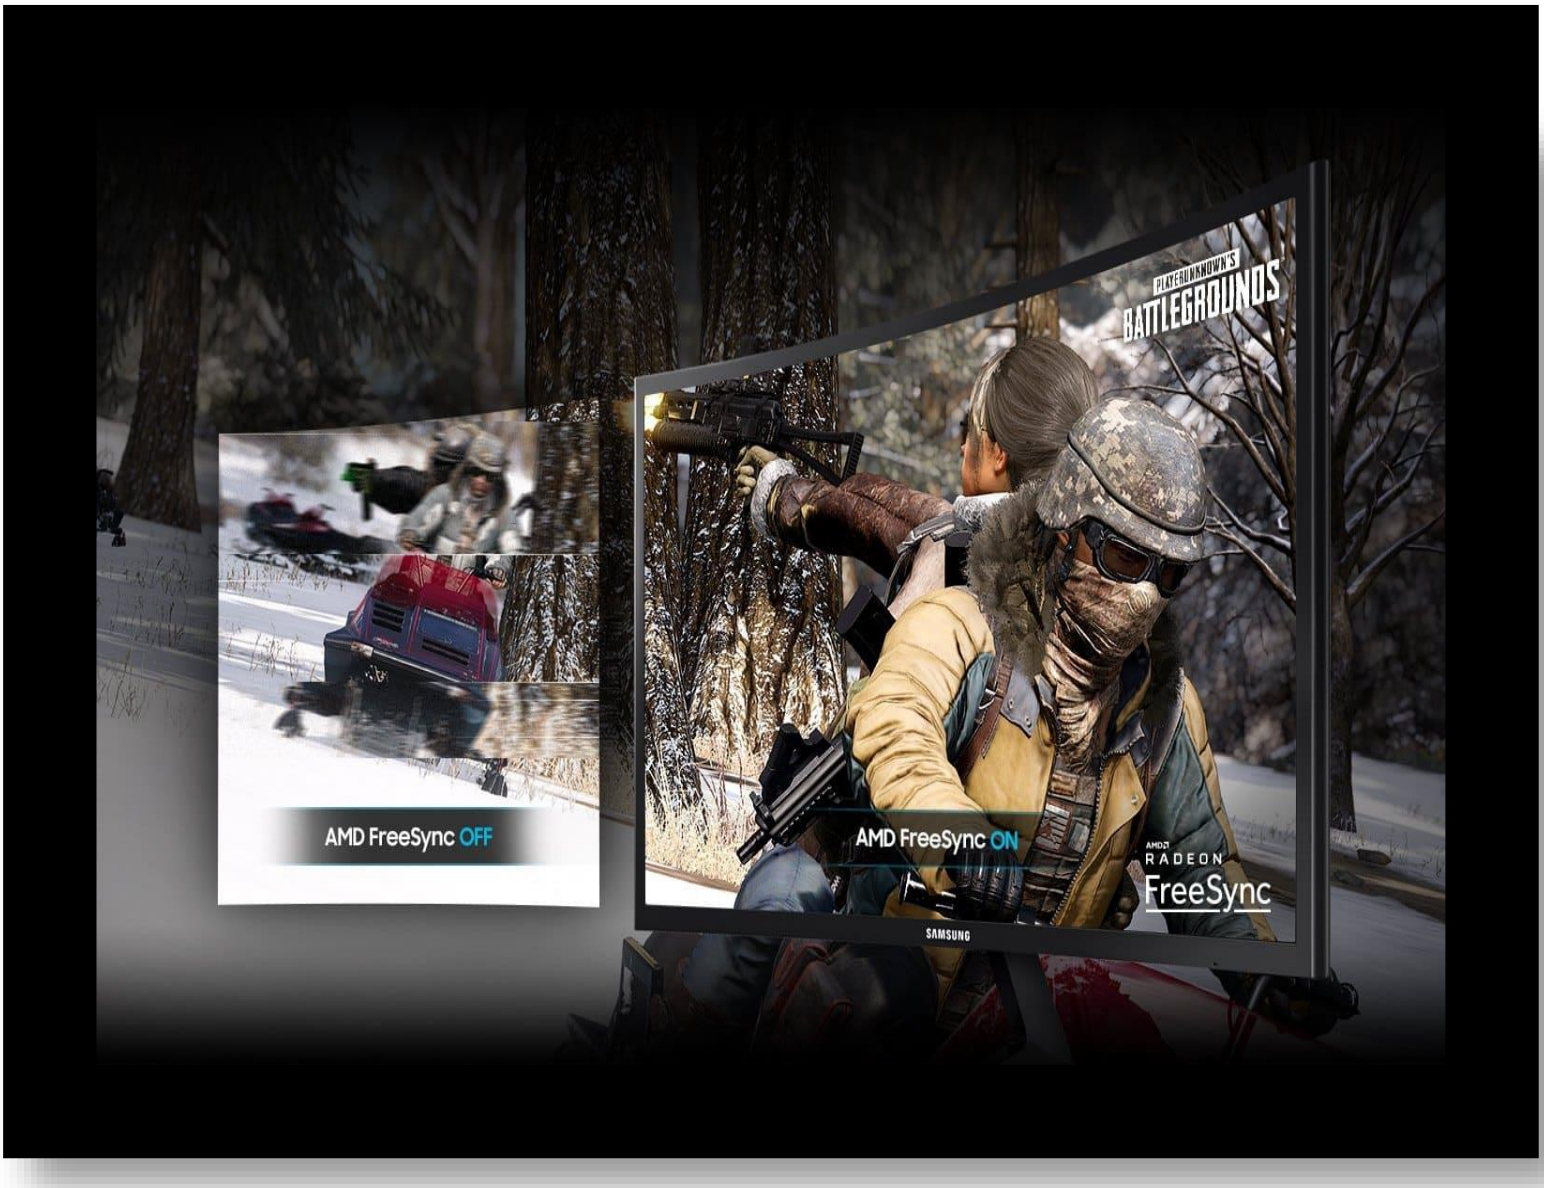
Smooth and clear action every moment. A refresh rate of up to 144Hz puts you ahead, even in the most demanding games. Spot the enemy instantly and notice tiny crucial changes in every scene. This can be easily changed to 60Hz, 100Hz or 120Hz

Gamer Exclusives

Get ideal settings for your game. Game Mode optimally adjusts black gamma levels, contrast, sharpness, and color for any game genre. Low Input Lag Mode minimizes delays between your input devices and display. Virtual Aim Point centers the target on the screen for more precise attacks on the enemy.

Flawless Action

No more choppy gameplay. AMD Radeon FreeSync™ eliminates image tears for exceptionally smooth, fast-action gaming. With a dynamically adapted display refresh rate, even the most complex game scenes are seamless and virtually stutter-free.



Fresh Eyes Win More

Play for even longer. Eye Saver Mode minimizes blue light enough to keep eyes relaxed and comfortable when gaming for extended periods. Flicker Free technology continuously removes tiring and irritating screen flicker so you can focus longer with less distraction or eye strain.

See Through the Dark

Give them nowhere to hide. A whopping 3000:1 contrast ratio lets you see dangerous objects or enemies with greater clarity. Blacks are deeper and whites are brighter with more levels of shades in between. Even when enemies hide in the dark, you can spot them quickly, before it's too late.
