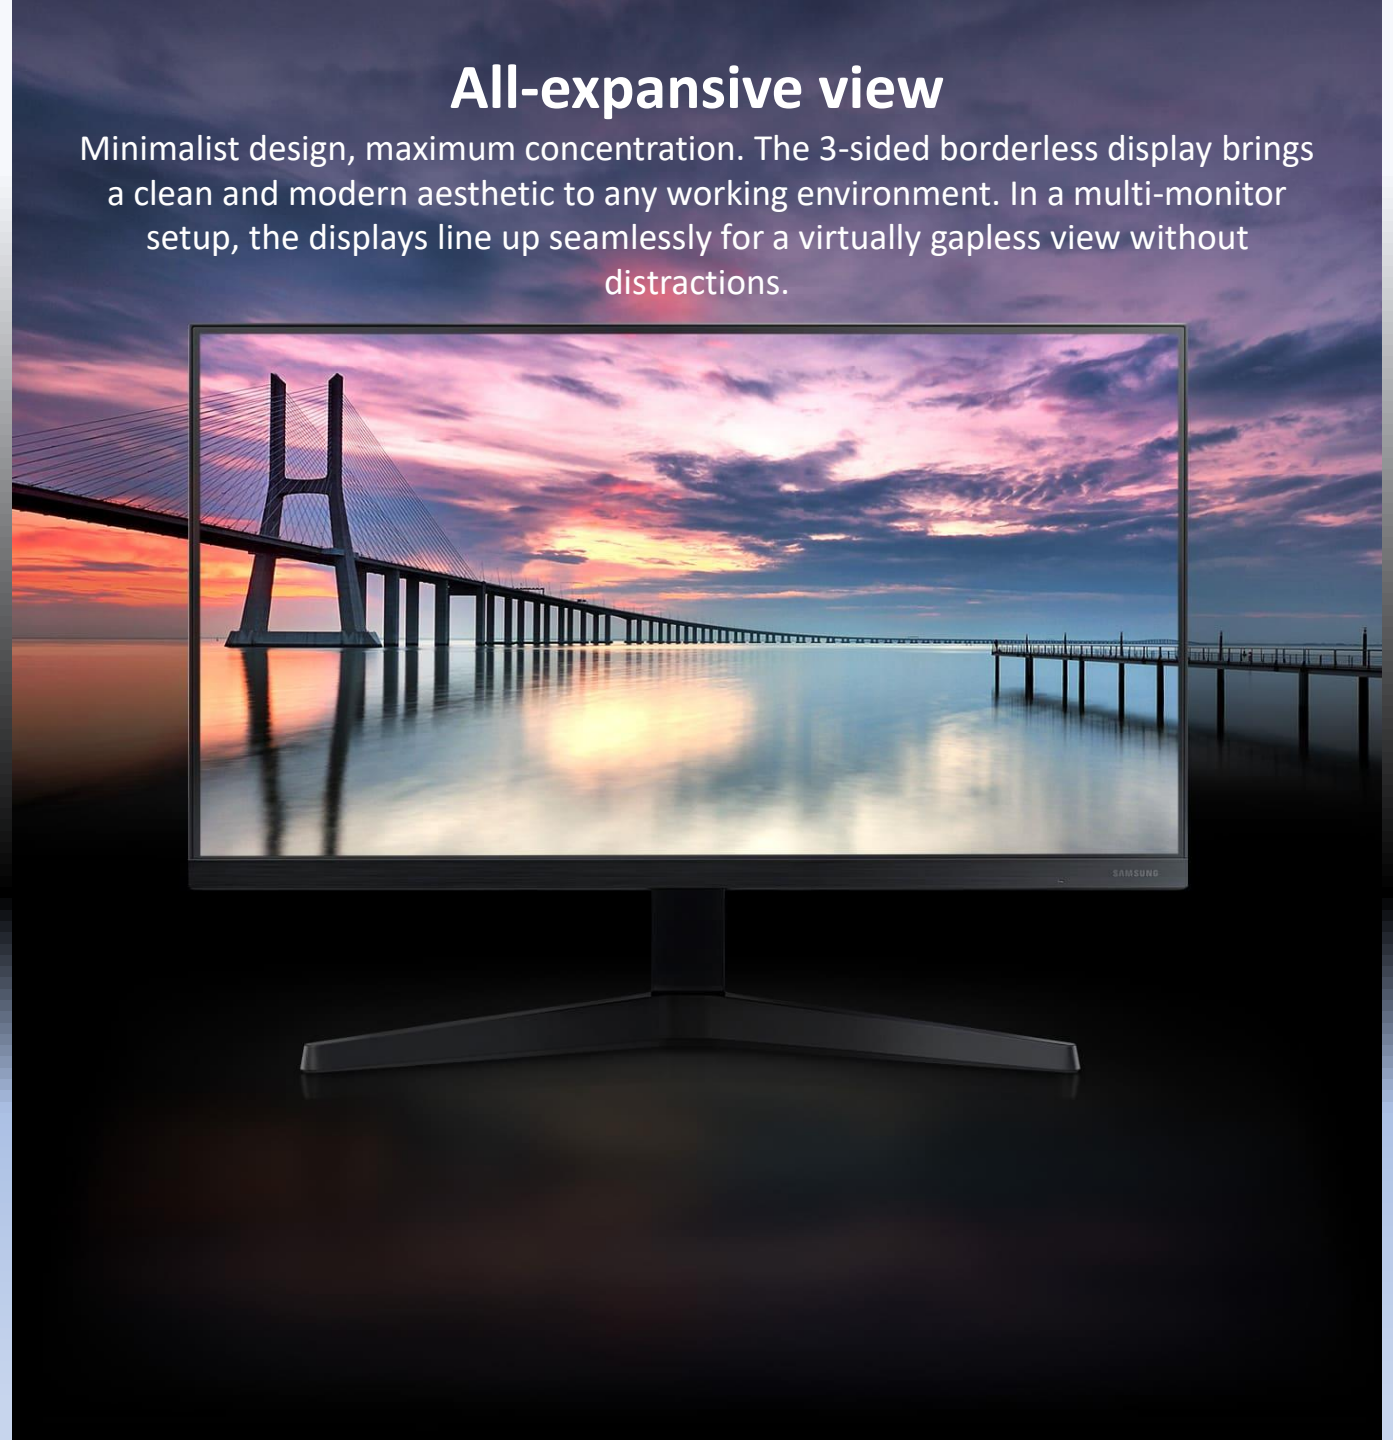
All-expansive view

Minimalist design, maximum concentration. The 3-sided borderless display brings a clean and modern aesthetic to any working environment. In a multi-monitor setup, the displays line up seamlessly for a virtually gapless view without distractions.



See It from Any Angle

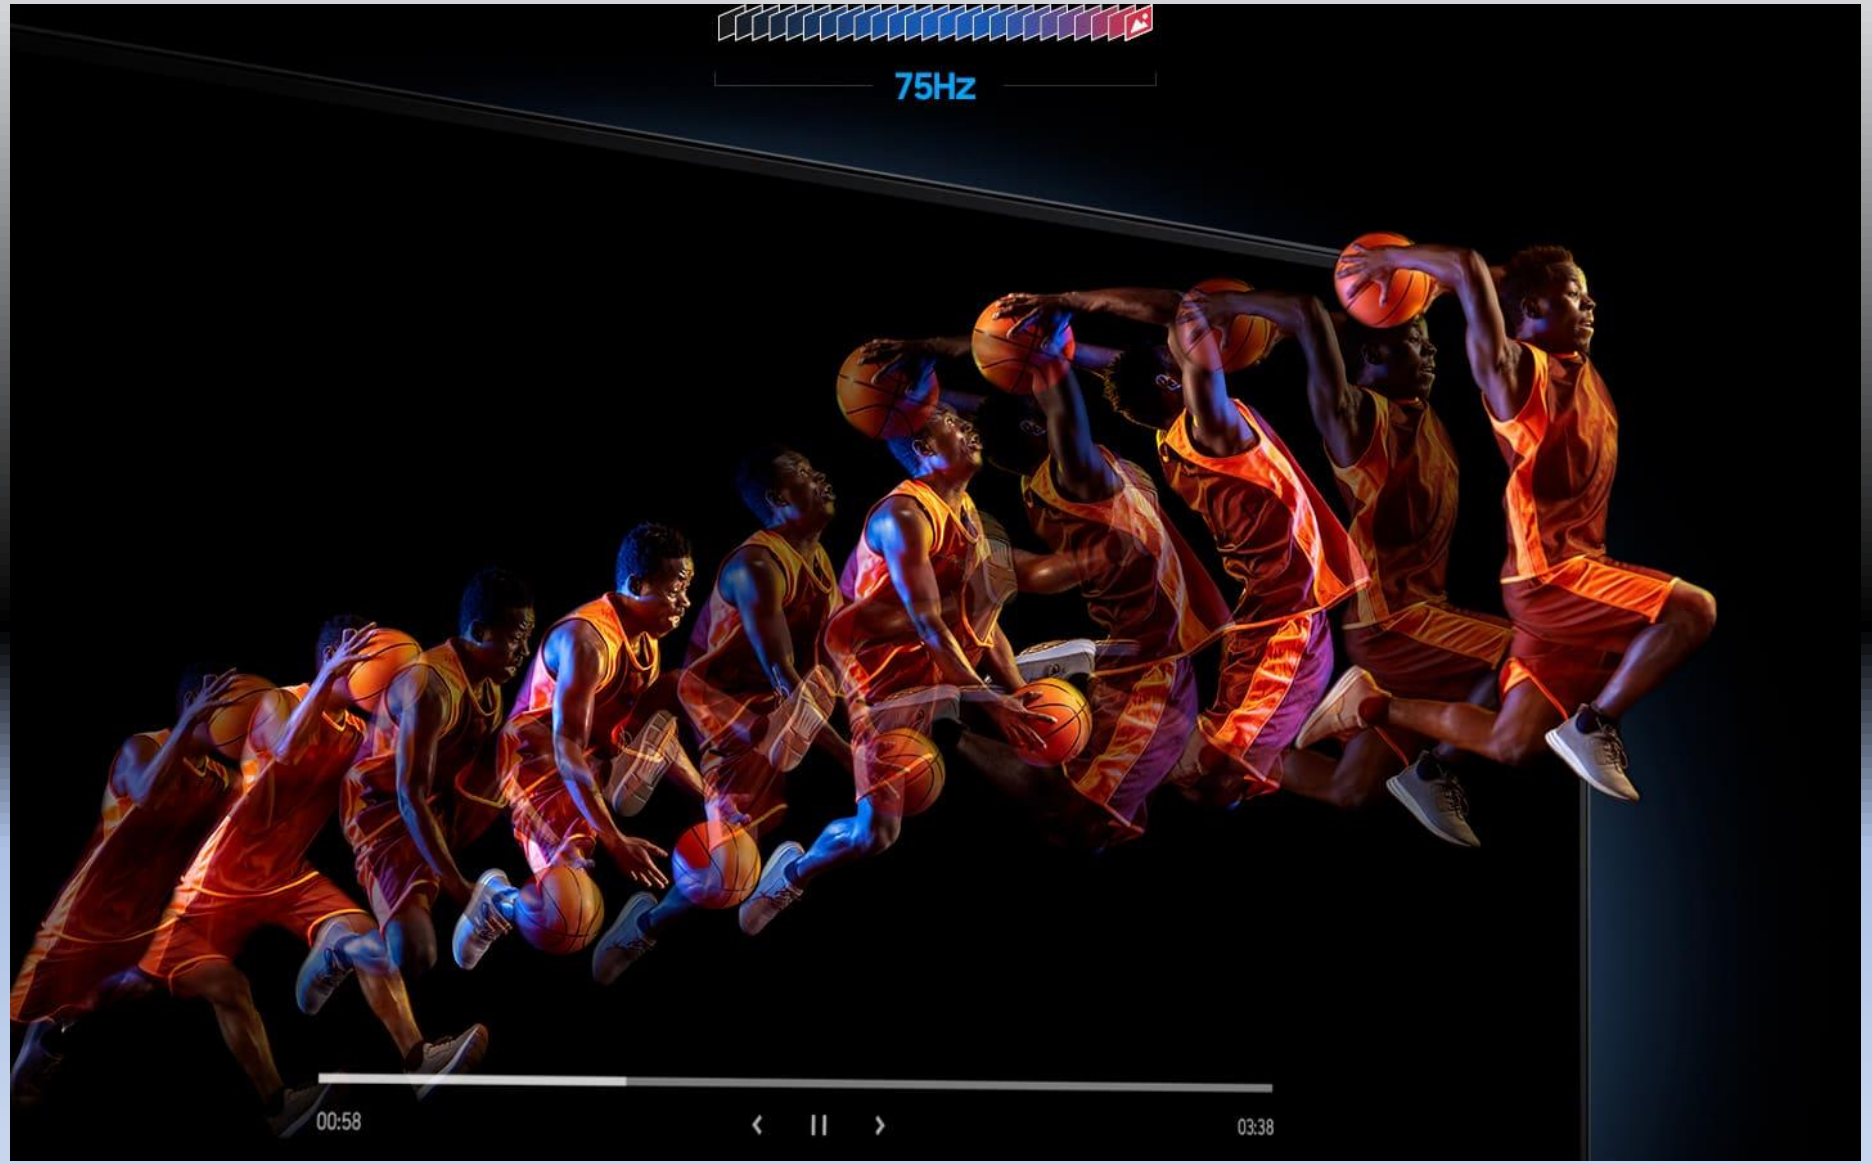
Sit anywhere and have a full technicolor experience. The IPS panel preserves color vividness and clarity across every inch of the screen. Even on a display this wide, tones and shades look completely accurate from virtually any angle, with no color washing.

Synchronized action

Superfluid entertainment experience. AMD Radeon FreeSync™ keeps your monitor and graphics card refresh rate in sync to reduce image tearing. Watch movies and play games without any interruptions. Even fast scenes look seamless and smooth.

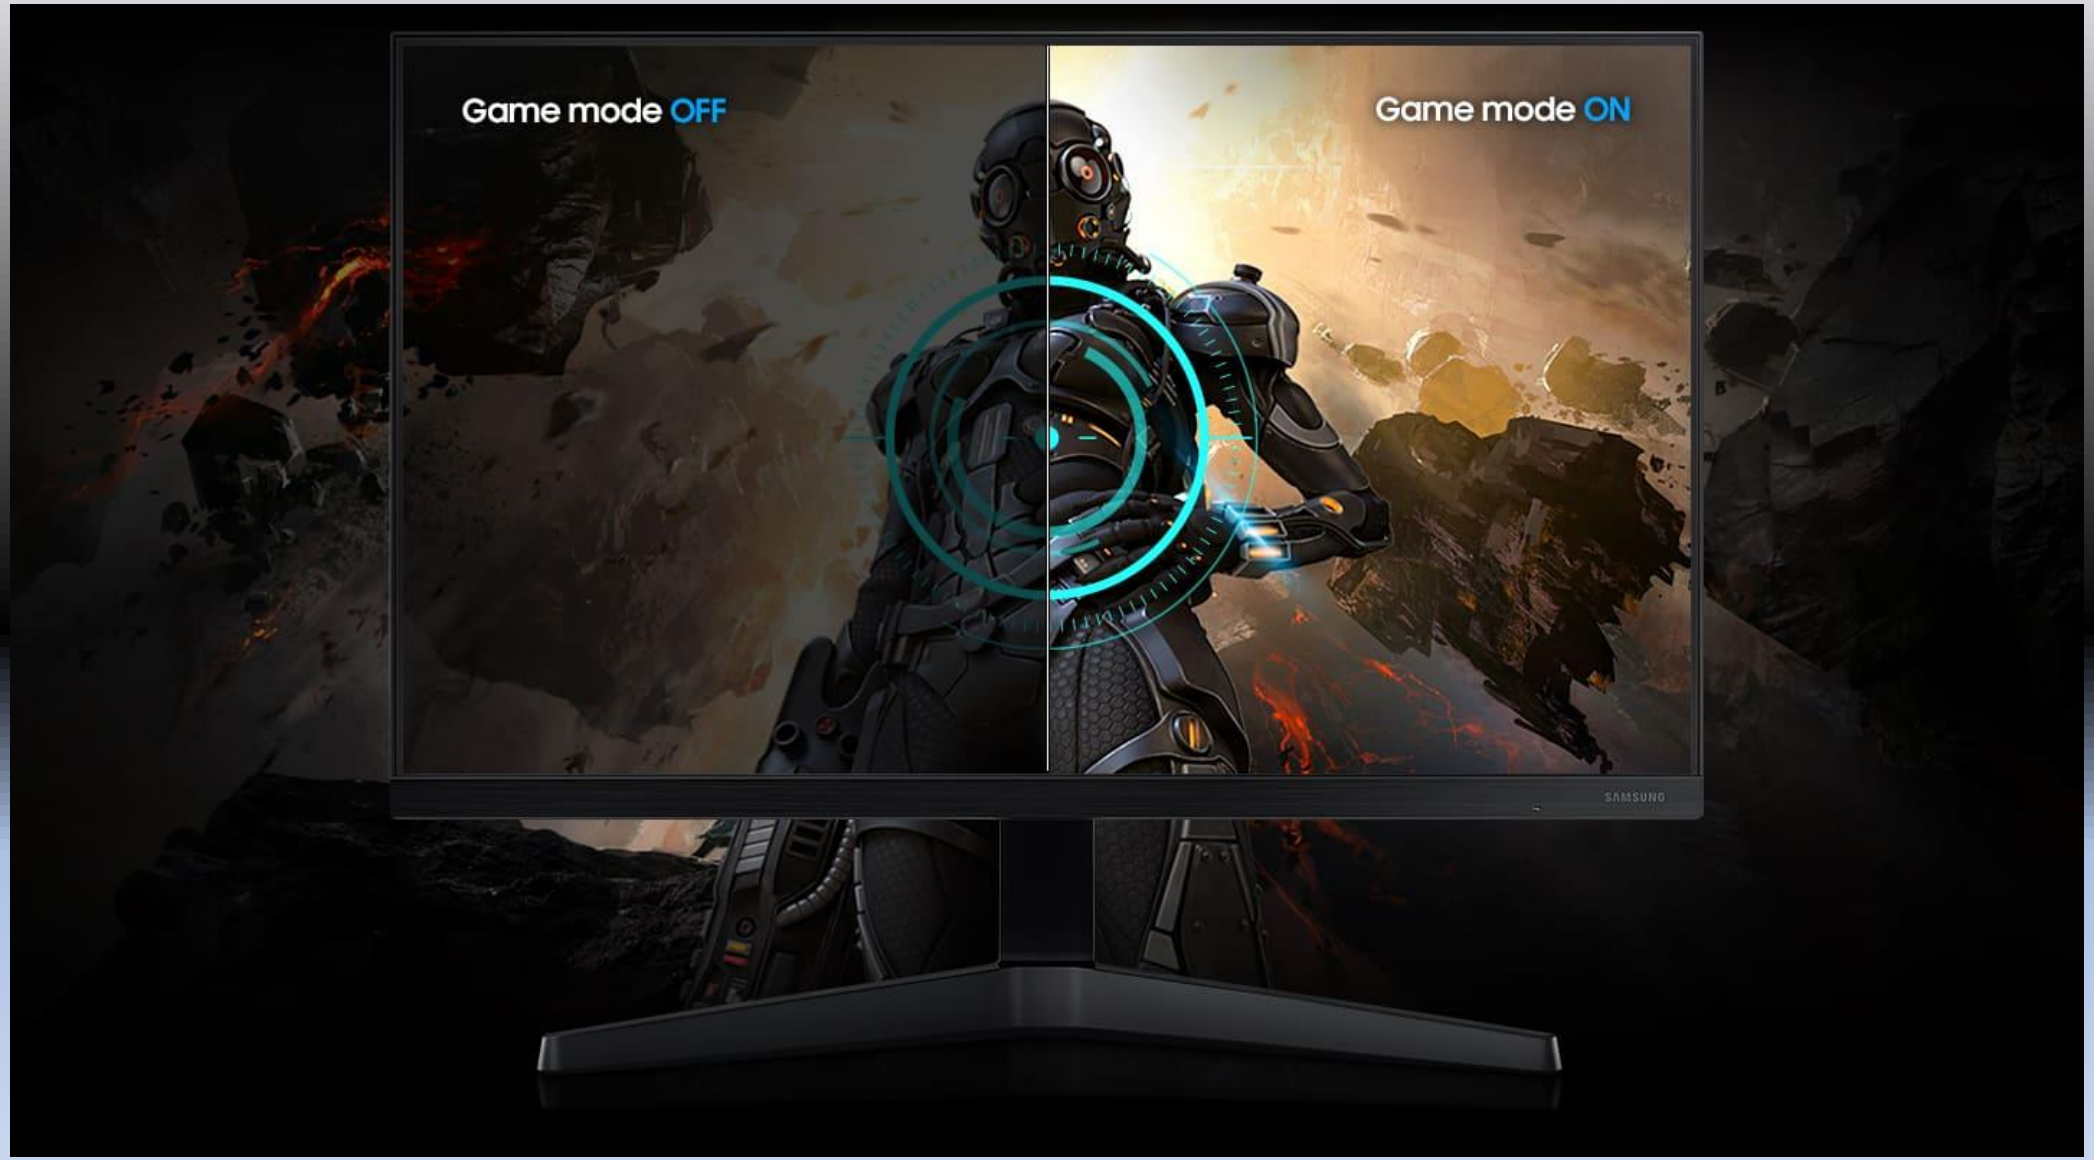
Seamless, smooth visuals

Now, the picture looks flawless. The 75Hz refresh rate delivers more fluid scenes. Whether you're catching up on your favorite TV drama, watching a video, or playing a game, your entertainment has no lag or ghosting effect.



More gaming power

Ideal game settings instantly give you the edge. Get optimal color and image contrast to see scenes more vividly and spot enemies hiding in the dark. Game Mode adjusts any game to fill your screen with every detail in view.



Superior eye care

Protect your eyes and do more. The advanced eye comfort technology reduces eye strain for less strenuous extended computing. Flicker Free technology continuously removes tiring and irritating screen flicker, while Eye Saver Mode minimizes emitted blue light. Your eyes stay fresh longer.

True versatility

Connect to more. With both HDMI and D-sub ports, multiple devices can be plugged straight into your monitor for complete flexibility. Now, your computing environment is even more convenient with additional input possibilities.
