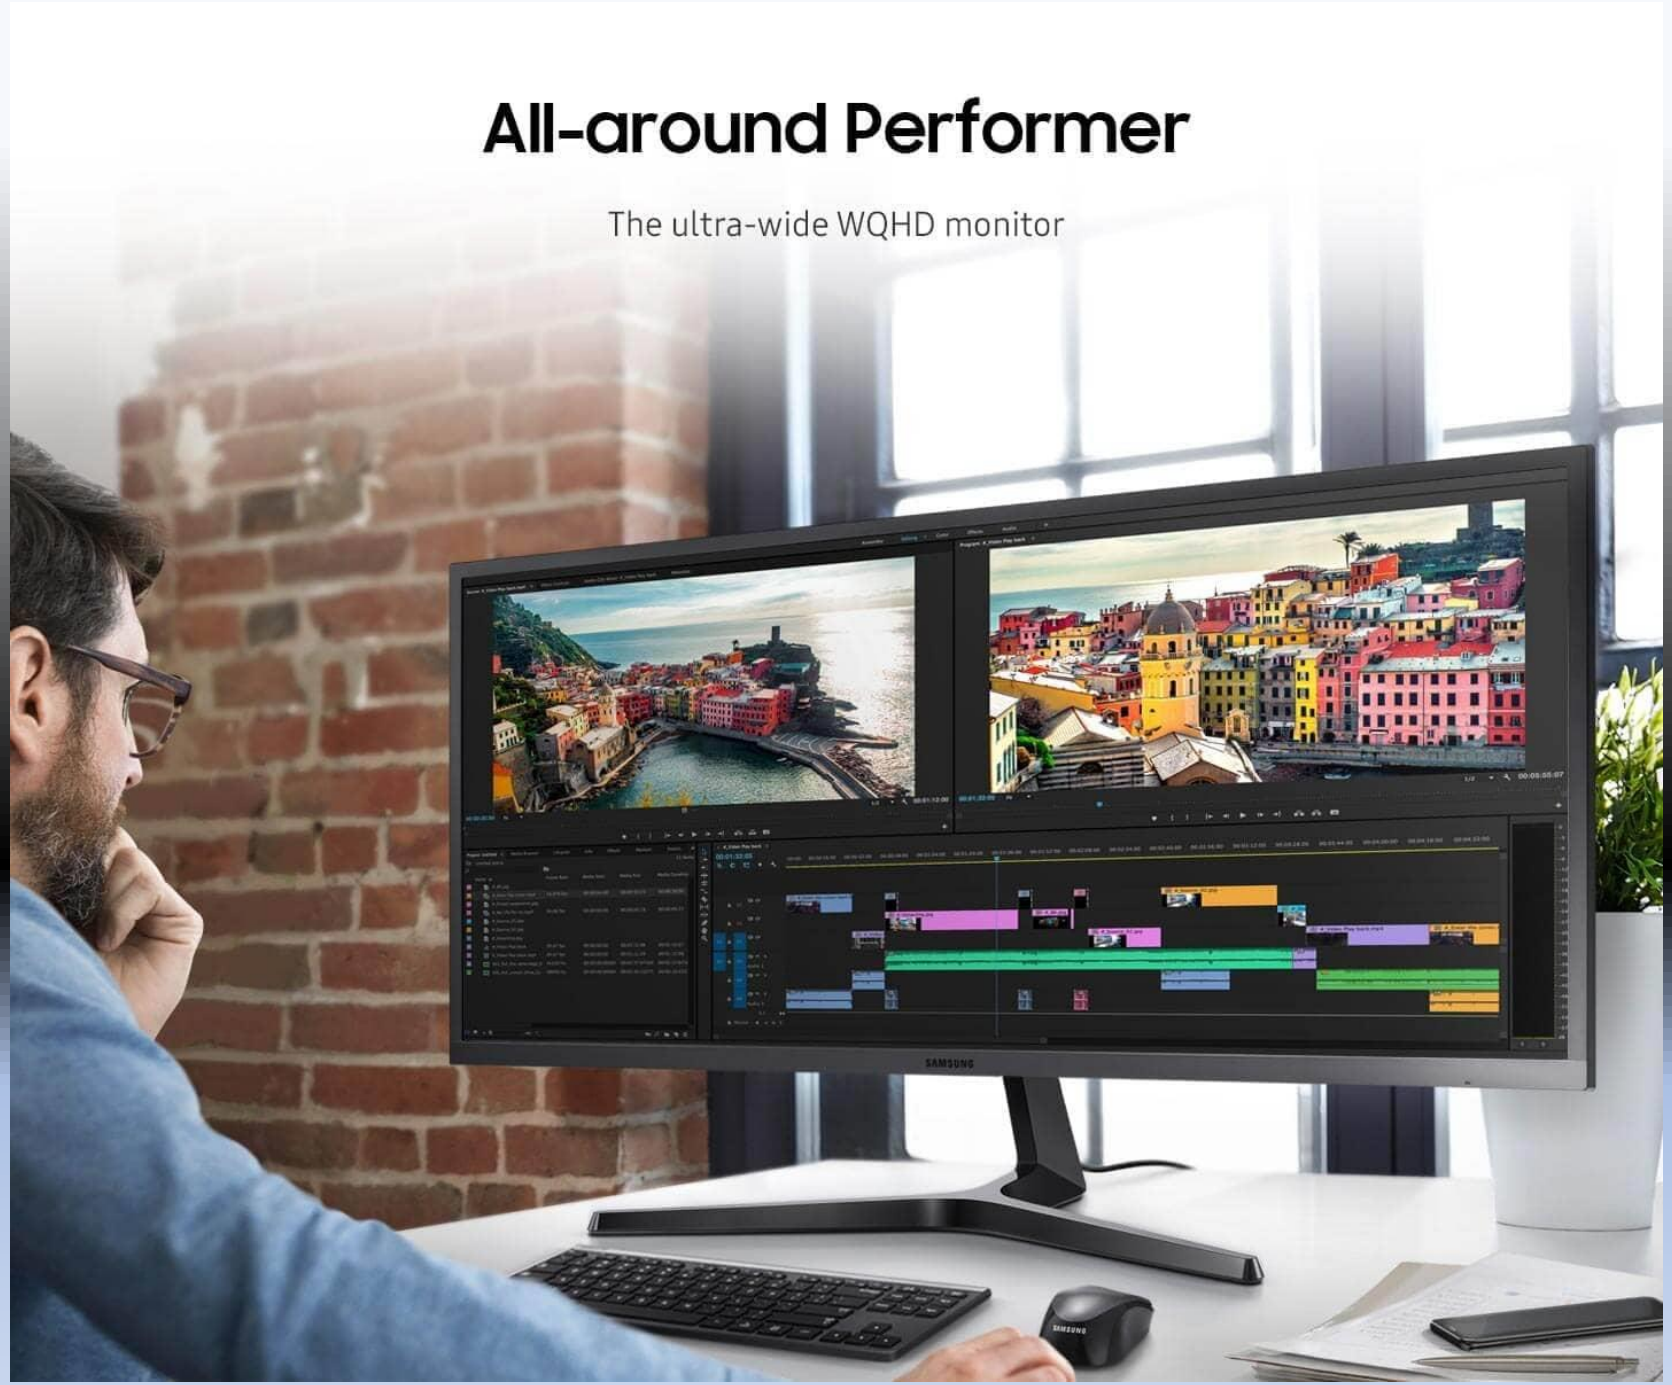
# All-around Performer

The ultra-wide WQHD monitor



# Seamless multi-tasking

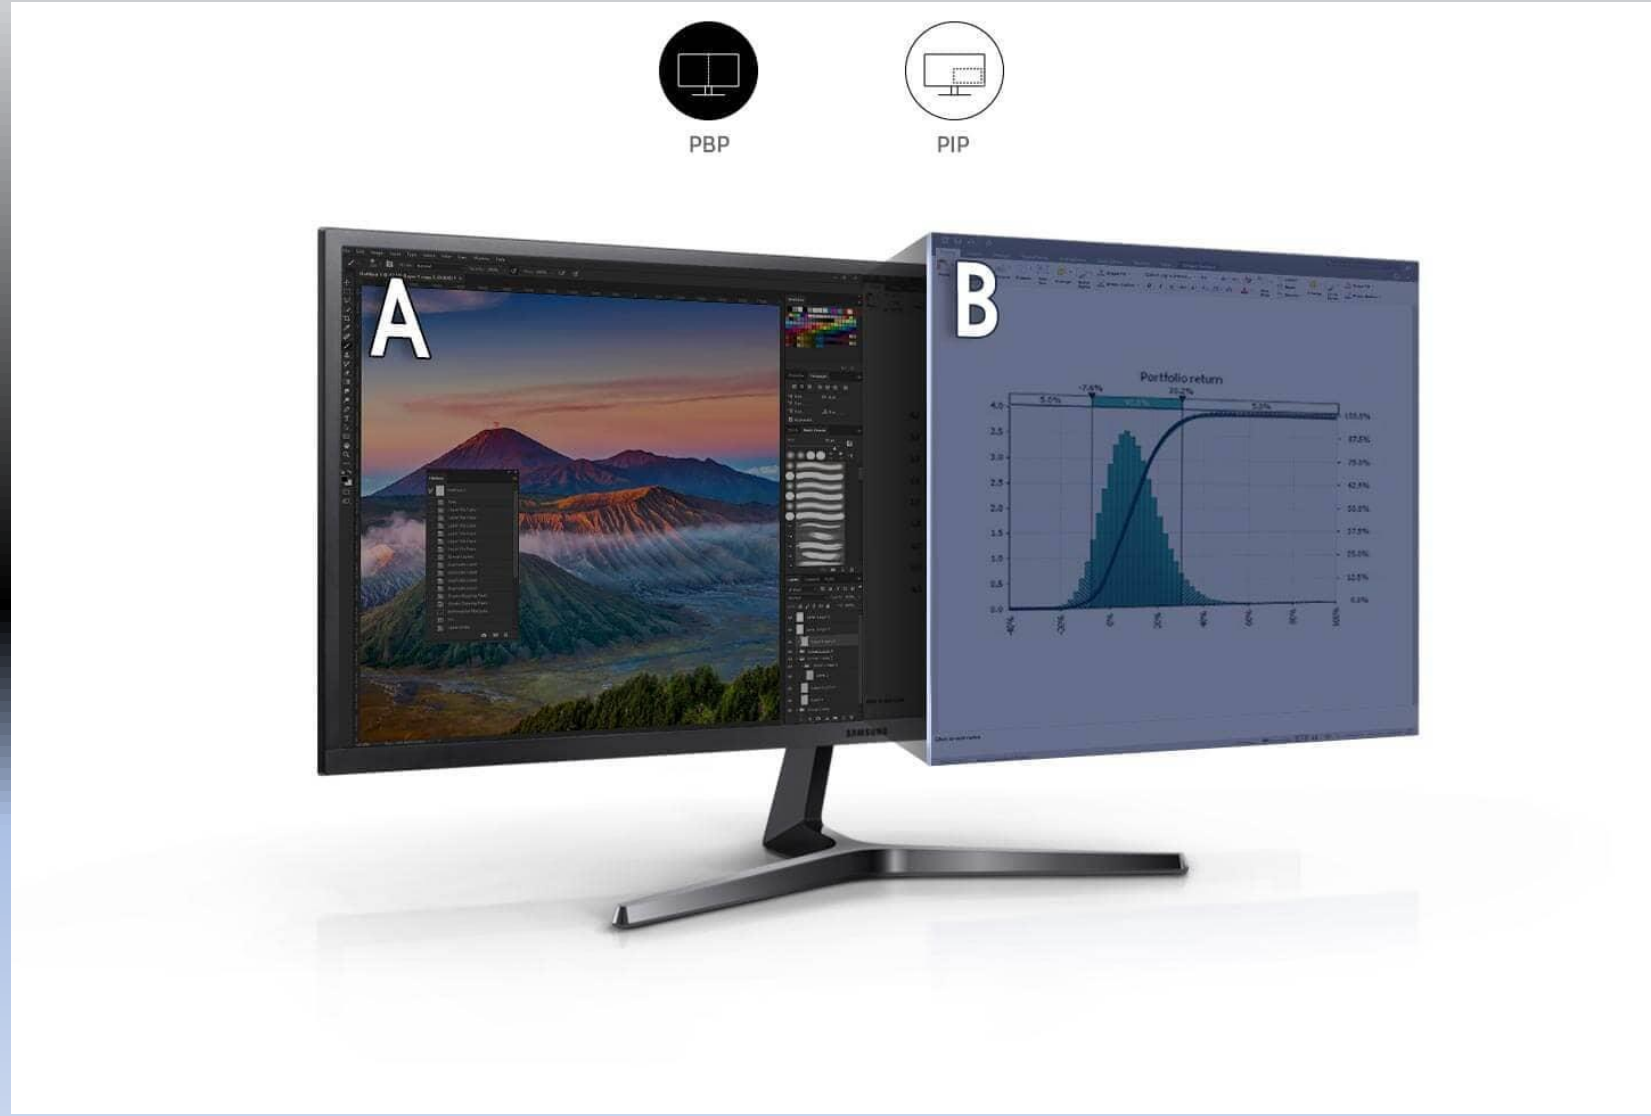
With its 34" ultra-wide screen and 21:9 WQHD resolution, the SJ55W provides all the workspace you need to comfortably multi-task on a single screen. And whether you're working on documents, playing games, or watching movies, you'll enjoy all your content in superbly detailed WQHD quality.

# WQHD Image quality

With a screen resolution of 3440x1440 pixels—approximately 2.4 times the density of Full HD— the SJ55W delivers razor-sharp images. And with more pixels to display content, you can view more of webpages and documents at once without scrolling or zooming out.

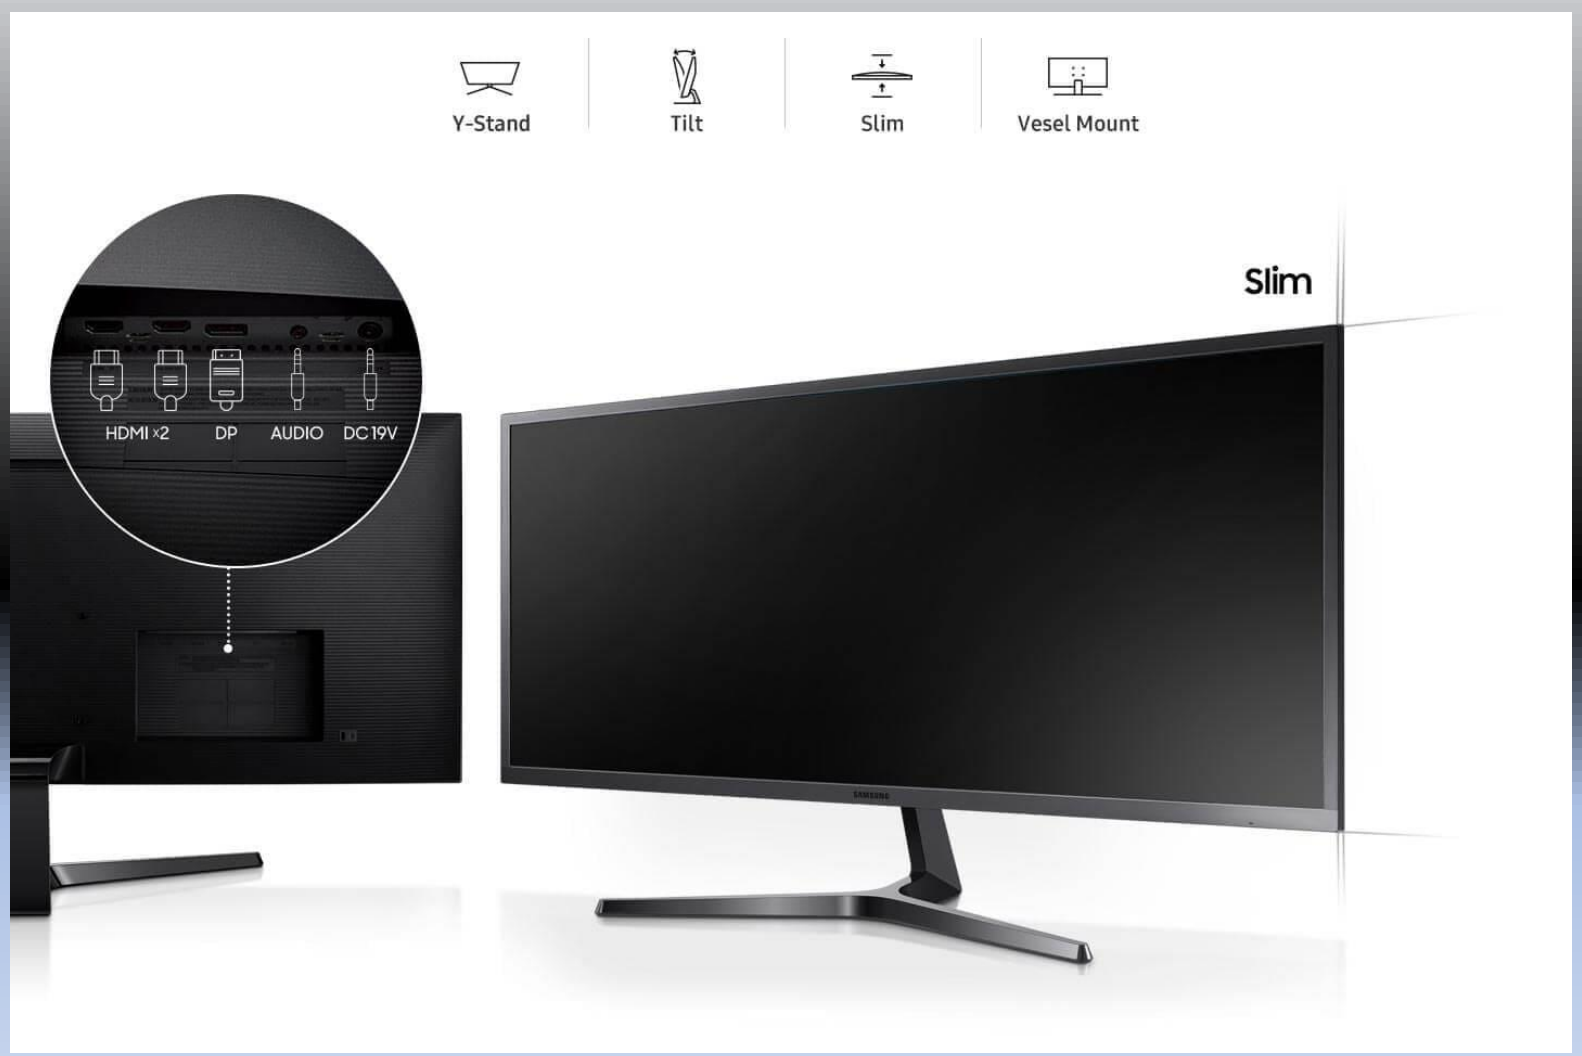
# PBP/PIP

Picture-by-Picture (PBP) function displays input from two sources side-by-side at their native resolution. And for optimal multi-tasking, Picture-in-Picture (PIP) lets you resize the second source to up to 25% of the screen and position it anywhere.



# Stylish and practical

The SJ55W’s slim panel, elegant Y-stand, and metallic bezel bring quality and style to the workplace or home. And with a VESA-compatible mount for precision positioning and DP and HDMI ports offering multiple connectivity options, the SJ55W is as practical as it is stylish.



# Smoother Gameplay

AMD FreeSync synchronizes the refresh rate of your graphics card and monitor to reduce image tear and stutter. And Low Input Lag Mode minimizes the delay between mouse, keyboard, or joystick input and onscreen response for a seamlessly smooth gaming experience.
