ADVISE, DESIGN, AND TRANSFORM

HPE Lifecycle Services

Advise, Design, and Transform Services define solutions to your IT and business challenges, build transformation plans and architect suitable designs to modernize or create your future IT environment.

Keep pace with change. IT innovation is constant but where do you start and how do you cope with the disruption? Advise, Design, and Transform Services connect you with a broad spectrum of infrastructure, storage, Big Data, cloud, and IoT expertise to answer these questions. We'll help you understand where to begin and how to make the case for change, providing you with solid advice on how to achieve the desired outcome for your business.

WORKSHOPS AND ADVISORY SERVICES

Advisory and Transformation Services help you define your strategy and road map for hybrid infrastructure modernization, identify individual projects to modernize business
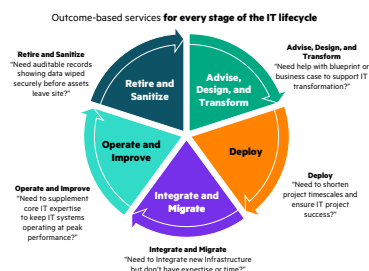

applications and workloads, and make technology decisions to minimize the total cost of ownership with reduced impact and risk during transformation.

Our subject matter experts will work closely with you to understand your IT/business objectives, your preferences, and define pragmatic next steps.

We do this in a variety of ways. Key business stakeholders from your organization can participate in specific workshops driven by an agenda tailored to your business objectives. Alternatively, there are simple pre-packaged offerings where we work with you to assess the impact of integrating the latest technology into your environment and build a robust plan to deploy with minimal disruption and delay.

WE'RE WITH YOU EVERY STEP OF THE WAY

Boost your IT performance today, modernize for the future, and maximize your return on investment over your entire IT lifecycle.

Outcome-based services **for every stage of the IT lifecycle**

ARCHITECTURAL DESIGN, MIGRATION, AND MODERNIZATION

Most organizations are looking for assistance to address these challenges because they lack the resources and expertise to complete them in a timely manner. HPE Pointnext Services has developed blueprints based on real-world experience that offer proven strategies for success in digital transformation.

The blueprints are pragmatic, aligned to best-in-class tools, offering a prescriptive-yet-flexible, step-by-step process to help guide your journey:

1. Prioritize workloads. Classify service level requirements and map workloads to SLAs, linking business requirements to technology decisions.

2. Design new infrastructure. Create a new design for your infrastructure and develop a plan to integrate elements of this new design into your current environment. This represents an end state but should be open-ended to incorporate new business demands.

3. Integrate governance. Integrate the new infrastructure into your existing data management and protection policies.

4. Plan migration. Develop a plan to migrate data and transfer workloads with automated tools. The plan will include a phased approach to implement new technologies over time to minimize disruption.

We'll work in collaboration with you to develop your transformation plan, design the future IT environment or build your IT modernization plan, once this is completed and approved by you, we'll even manage the transition from start to finish, overseen by one of our experienced program managers.

MANAGEMENT OF CHANGE (MOC) AND EDUCATION SERVICES

In tandem with your transformation, our training consultants will work with your team to assess your current skills level and design the training programs that you need to ensure productivity and readiness for operating in your new technology environment.

WHY CHOOSE HPE POINTNEXT SERVICES?

Benefit from innovation built on HPE intellectual property. This lowers your risks and costs using proven best practices, automation, and methodologies that have been tested and refined by HPE experts through 11,000 IT projects a year.

Work with best-in-class ecosystem partners. Accelerate your business with experienced, certified experts who can assist with a wide range of HPE and multivendor technology.

Get help when, where, and how you need it. Tap into a global delivery organization in more than 80 countries. Integration and Performance Services are available directly from HPE Pointnext Services or via our global channel partner network.

Choose from customized, standard, or turnkey solutions. Get the ultimate in flexibility with standard deliverable packages for an off-the-shelf solution, or custom services tailored to meet your individual needs.
