

End-to-End Workflow Automation, Simplified with **BMC Control-M**

What is **Control-M**?

Control-M is workflow orchestration software that automates scheduling, managing, and monitoring application and data workflows. It enables organizations to **orchestrate complex jobs and data pipelines across mainframe, distributed, and cloud environments**. With centralized control and visibility, Control-M improves reliability and scalability, accelerates application and data delivery, and helps teams meet business SLAs more efficiently.

Benefits of Control-M

- Simplify Workflows
- Accelerate Delivery
- Improve Reliability
- Increase Flexibility
- Empower Teams
- Optimize Costs
