

Securing Every Touchpoint in Finance

In a sector where compliance is non-negotiable and data breaches cost more than just money; endpoint security must be seamless.

Hexnode simplifies IT for financial institutions by:

Automating Compliance & Encryption

Enforce encryption, manage BitLocker keys, and ensure policy compliance—without manual intervention.

Securing Data Beyond Office Walls

Prevent data leaks with geofenced access, app restrictions, and remote wipe—even on BYOD and mobile sales devices.

Controlling Every Device, Anywhere

Lock devices into kiosk mode, track their location, and instantly push or wipe content remotely across branches and BPOs.

Minimizing Risk with Proactive Controls

Block unauthorized USB access, schedule security patches, and monitor compliance—all from a centralized console.

Create secure, audit-ready environments—efficiently.

Discover how Hexnode helps FSI teams stay in control.
